

Competency Management

Elevate Readiness. Empower Your Leaders.

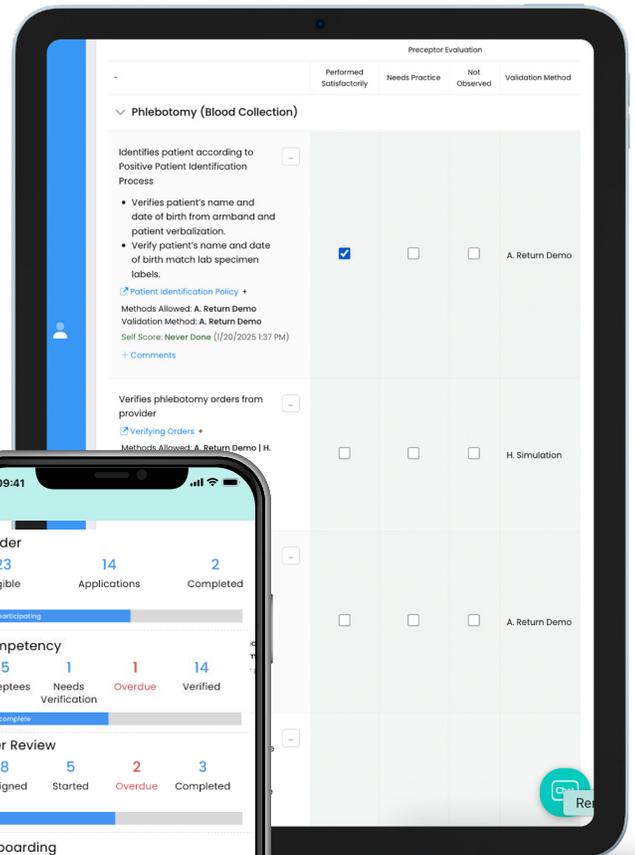

StaffGarden's Competency Management solution streamlines validation workflows, standardizes competencies, and empowers managers with real-time insights and fast compliance tracking – including annual competencies aligned to strategic goals.

Why Leading Healthcare Executives Love It

Never-before-possible in-workflow data capture empowers your leaders to elevate care.

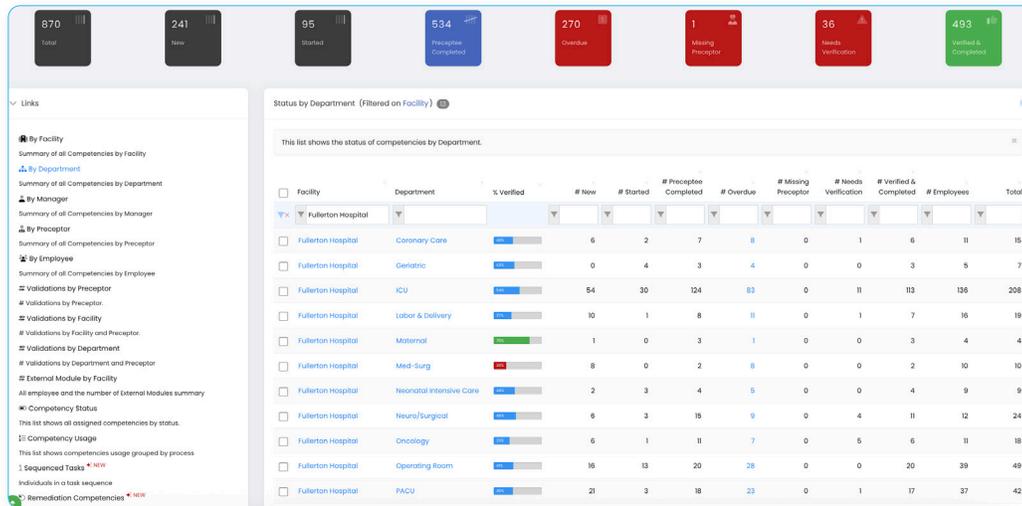

- Standardize competencies and reduce care variability
- Eliminate handwritten documentation risks and inefficiencies
- Give leadership visibility to orientee and preceptor progress
- Collaborate to tailor annual competencies to individual and organizational goals

\$6k Savings per nurse with 12 days **faster time to competency**

“Often we find that they’re achieving those [timelines to competency] more quickly because they’re laid out in a manner that makes sense when they build on each other. But if we do have someone who’s taken longer, it really gives the leader a chance to intervene on an earlier tier than getting to the end and the preceptor saying they’re not ready.”

Trina Rayle, MSN, RN, NPD-BC, Manager, Nursing Professional Development & RN Residency Program Director, Parkview Health

Smart Tools for Scalable, High-Quality Care

Features purpose-built for healthcare work together to reduce risk, accelerate readiness, and empower clinical leadership.

- **Mobile-friendly bedside validation** makes it easy to assess skills in real time with comprehensive data-capture so you’re always audit-ready
- **Real-time dashboards** show orientee progress, preceptor activity, and assignment gaps for early intervention
- **Group verification & multi-preceptor assignment** scales preceptor tasks and maximizes orientee access to the right experience – faster
- **ePortfolio centralizes staff CV data** and integrates with HRIS systems for easy documentation capture, unlocking compliance dashboards for visibility into certifications, education, ladder participation, turnover, and more
- **Digital framework standardizes but is configurable** to organization and individual needs, including support for TSAM
- **Co-create tailored annual competencies** with integrated collaboration features to align to organizational and individual goals
